

Salt Spray Test Confirms Vidir's Superior Finishing Process

The sample on the left shows **Vidir's P&O coil steel**, acid washed, phosphated, **patented polymer sealing agent**, oven dried, super durable U.V. stabilized polyester powder coating, **500 hours salt spray test**.

The sample on the right shows **standard coil steel**, acid washed, phosphated, **standard sealing agent**, oven dried, super durable U.V. stabilized polyester powder coating, **330 hours salt spray test**.

The difference is obvious. With Vidir's P&O coil steel and patented polymer sealing agent you get a superior, more brilliant, longer lasting finish.

Fertilizer Bins

Vidir bins are ideal for fertilizer storage. The superior finishing process, that starts with P&O steel and finishes with fertilizer grade epoxy powder coating outperforms standard finishing systems by a wide margin.

Vidir's generous 45° bottom cone slope allows fertilizer to flow freely for total cleanout. Standard fertilizer bin features also include:

- 3 view glasses
- A 1 piece formed stainless steel poke hole - (no welded seams)
- Rack and pinion roller crank slide gate with 24" of clearance
- Fixed roof and sidewall ladders with traction rungs • 26" dia. spring loaded, ground operated, vented lid and
- Manway in bottom cone.

Available options include:

- Stainless steel bottom for slide gate
- Complete stainless steel slide gate assembly
- Roof ladder handrails
- Sidewall ladder safety cages
- Lockable ladder gate
- Steel skid foundations and more.

Feed Bins

Standard Vidir feed bins come in sizes from 11.6 to 84 tons. For larger capacities - up to 175+ tons any Vidir bin can be ordered with a 55° bottom cone for bulk feed storage.

Standard features include:

- Powder coating inside and out
- 55° bottom cone slope
- Side wall and roof ladders with traction rungs
- 1 view glass 6" above bottom cone
- 26" spring loaded, ground operated, vented lid
- 24" clearance under bottom cone.

Available options include:

- Stainless steel poke hole
- Crank slide gate assembly in mild or stainless steel
- Various adaptor boots including Choretime compatible
- Pail chute
- Leg extensions
- Steel skid foundation.
